

Bingo With 10 Game

Prerequisite: *Comfort counting to 10, some comfort counting to 20*

Place a random collection of 16 Number Cards from 0 to 20 with expanded form on a 4 by 4 bingo board for each child. Then, mix up a collection of counting cards from 0 to 20. Select one card at a time from this pile until the first child gets four in a row and yells Bingo!

One important variation of this game is to do a “Tens-Reversed” version using cards with numerals. When a card is chosen, if it is 1 to 10, then 10 is added to find the matching value, and if it is 11 to 20, then 10 is subtracted for the matching value.
