# Geometric Art

## Activity

> **Prerequisite:** *Comfort counting to 10, some comfort counting to 20*

Here are some geometric concepts your child can play around with. The first is the idea of similarity. Two shapes are *similar* if they have the same shape except that one is smaller or larger than the other. Challenge your child to pick a picture and draw it twice as big or twice as small.

Another geometric concept to play with is mirror symmetry. Your child can see this by taking a mirror with a flat side and putting it down along its edge on a drawing or photo and seeing what the mirror image looks like. Once your child has the idea, give your child half of a picture and challenge them to draw the mirror image.
